

# FIREFLY Aluminium Foil Reinforced Tape

## Material Description

FIREFLY Aluminium Foil Reinforced Tape is comprised of fire-retardant acrylic adhesive and reinforced with two non-combustible layers; a layer of Fortaglas and a layer of aluminium foil. Available in a 75mm x 50m roll.

## Applications

Used for sealing FIREFLY non-combustible sarking joints. Also used to seal the cut joints of the Vulcan Thermal Break.

### Certification

AS1530.1 each layer tested for non-combustibility and deemed non-combustible.

CSIRO report FNC12071 (for foil layer).

CSIRO report FNC11220 (for Fortaglas layer).

### FRL

For subject FRL refer to referenced reports.
