

FIREFLY Vulcan R0.2 Thermal Break

Material Description

FIREFLY Vulcan R0.2 Thermal Break is comprised of Fortaglas and aluminium foil. It is non-combustible and contains no binders or adhesives. Available in 6mm x 90mm x 150mm individual pads and 6mm x 90mm x 10m roll of pads.

Applications

Used in between metal frame and external cladding in building façades, to minimise heat leakage / thermal bridging.

Certification

AS1530.1 tested for non-combustibility.

CSIRO Report FCO-3289, FNC-11220 and FNC-12071

FRL
